

**Hi I'm Dylan**

Recent first class graduate in Computing  
from De Montfort University,  
fueled by creativity, and willing to enhancing  
users' experience online.

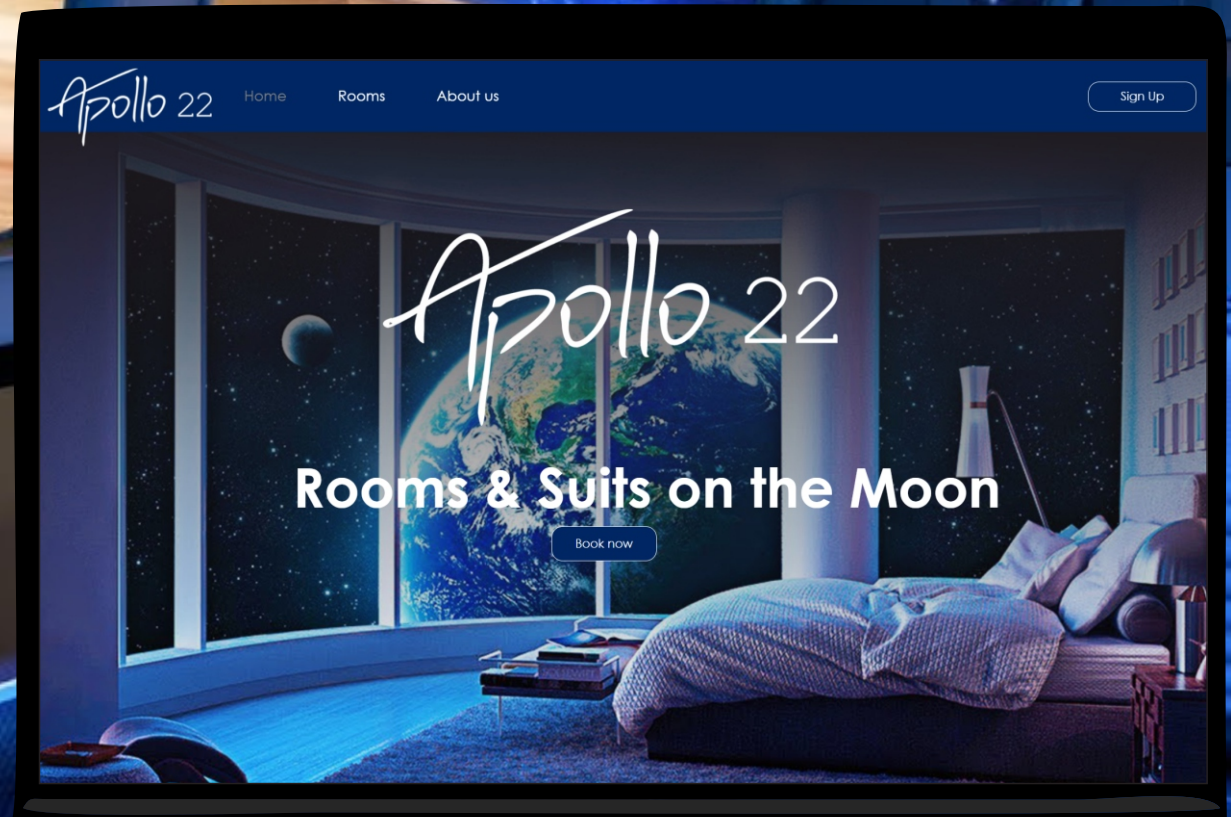

This is a futuristic yet philosophical perspective on design. The client approached us to develop a website for hotel bookings, initially envisioning a simple booking system.

I reimagined the system with a touch of modernity and a myriad of possibilities. What if we could book hotel rooms on the moon one day? If so, what would the website look like?

Tools Used:  
CorelDraw HTML CSS  
Visual Studio Code C#

# Apollo 22

## Book a room on the moon before sunset.

E-commerce to it's coolest

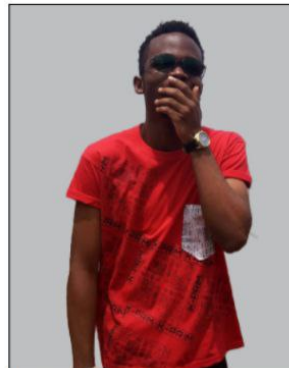

The 10 Usability Heuristics for User Interface by Jakob Nielsen. This is what unfolds when you adhere to usability guidelines to address usability issues.

An e-commerce website distilled to its purest, yet most stylish essence. The client, K-Prim Wear, envisioned colors that would embrace and caress users on the forehead, providing them an unforgettable journey.

As I always say, the epitome of cool.

Tools Used:  
CorelDraw HTML CSS Microsoft Visual Studio C#
